I possess a solid technical aptitude in Full Stack development, with a primary emphasis on JavaScript. I specialize in employing React and Redux for frontend development and leveraging Node.js, and Express for backend operations.

My professional background includes collaborating effectively within a team environment. I have held the role of a team leader on a small-scale project, demonstrating leadership and organizational skills. I excel in managing GitHub repositories, deploying applications, and delivering precise time estimates for task completion.

TECHNICAL SKILLS

- HTML5/CSS3/SASS
- Responsive/Adaptive design
- JavaScript
- TypeScript
- React/Next.js
- Redux
- REST API
- Node.js
- PostgreSQL, Sequelize
- Express

Mate Academy
2022 - 2023

MANAGER LOGISTICS

Poltava National Technical University
2018 - 2022

WORK EXPERIENCE

JavaScript Developer

Aurora Multimarket   01.05.23 - 31.10.23

- Writing module functionality in JavaScript and maintaining existing code.
- Created API interaction based on REST requests using Node.js, JavaScript and MSSQL.
- Conducted testing and review of the code of the system components for error analysis and stable operation.
- I worked on the implementation of data transfer to Google BigQuery using a server written by me in Node.js and binding to the CRM using REST requests.

Fullstack Developer

Freelancer   02.08.22 - 01.03.23

- React application development.
- Creating API servers.
- Creating responsive landing pages with pixel perfect implementation.
- Reviewing other programmers' code and working in a team on non-commercial projects.

PROJECT EXPERIENCE

Product Catalog   GitHub   Demo

Next.js, Bootstrap, Animate.css, Socket.io, TS, JS, I18next

- Using Next.js for the best page rendering experience.
- Using Socket.io to display the number of users viewing your website

Kanban Board   GitHub   Demo

React, JavaScript, TypeScript, LocalStorage

- A fairly simple kanban board for displaying cases
